

Computer Classes

at Casa Aztlan

http://casaaztlan.org/computer_classes

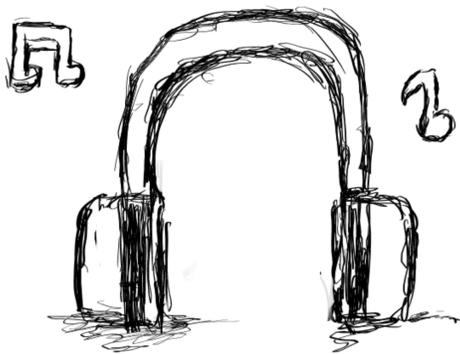

How Computers Work

Mondays @ 4:00-6:00 from March 23-May 4
(english only)

An introduction to the inner workings of computer components and software. Students will learn how to build and troubleshoot computers, as well as learning how they work, what the internet really is, and how to expand their knowledge using freely available resources. Students will also learn about free and open source software.

Instructor: Mike Thompson

To sign up, call (773) 661-4044

Radio News Magazine Workshop

Tuesdays, Wednesdays, and Thursdays from 5:00-7:00pm
(english and spanish)

Youth will produce and host news stories in English and Spanish with free software. The stories will focus on community, educational, cultural, and immigration issues. The goal of this workshop is to empower minority youth by giving them a voice in both traditional and new media and inform the Latino community about educational, cultural, and community events taking place in Chicago.

Instructor: Saraí Linares

To sign up, call (312) 666 5508 ext. 130

Image Editing & Digital Art with the GIMP

Tuesdays @ 6:30-8:30pm from March 24-April 28
(english only)

Learn how to edit images and create your own art on the computer using a free and open source imaging program called the GIMP (GNU Image Manipulation Program). Students will learn through exercises involving making their own photo comics.

Instructor: Christopher Webber

To sign up, call (773) 661-4044
